The next generation coin changer and recycler

6 tube cassette system for maximum coin capacity and flexible tube configurations

3 independent payout motors for highest payout security

4 user interfaces fulfill individual requirements

currenza

Coin changer and recycler

currenza **c²**

The currenza c² - coin changer makes your vending machine more profitable & reliable – and your customer more satisfied.

Reliability:

- Latest NRI validation technology, with patented new sensor system and 40 measurements of coin parameters
- Unique Payout Redundancy Protection (PRP) system: 3 independent payout motors and the 6 tube cassette system offer maximum payout security and minimises machine down time; because 1 motor controls 2 tubes – in the unlikely case of a motor jam there are still 4 coin tubes for payout available
- Extremely reliable optical sensor system with industry leading operating temperature of -25 to +80 °C guarantees reliable operation independent of environmental conditions

Profitability:

- 3 independent motors, with payout of up to 3 coins simultaneously at up to 6 coins/s minimises transaction times
- 4 user interfaces fulfilling individual requirements – c² blue: with display and keys, c² green: with keys, c² white: without keys or display, c² orange: without keys and display but with internal IrDA
- HENRI service module with SIM card slot for simple and quick programming & currency updates needed for c² green, white and orange
- 6 self filling tubes reduce refilling needs; c² optimiser provides optimum set-up of payout configuration & float levels for less cash stock in the c²

Flexibility:

- Cassette system with 6 tubes:
 - Acceptance & payout of all the world's circulation coins
 - Additional maximum capacity of low replenishing coin denominations
 - Huge range of potential payout configurations
 - 22 % higher change capacity than other 6 tube coin changers
- User-friendly intuitive menu structure for individual configuration

Additional features:

- Robust coin cassette, can be replaced even while completely filled
- Water penetration protection of internal components
- Easy & fast access to sorting area for easy cleaning

Options:

- **currenza c² airport**: Integrated alarm and audit solution providing alarm text messages and digital remote data transmission of vending machine data
- **currenza c² security**: Integrated security sensors observing coin cassette and validator, guarantees 24/7 cash anti-theft protection
- c² ccTalk: c² with integrated ccTalk interface for the direct connection of up to 4 coin hoppers – perfect for maximum coin payout
- c² USB: directly connects to PC
