# Coin changer with alarm system

**currenza c<sup>2</sup> airport**

The currenza c<sup>2</sup> airport system is the unique alarm and audit solution inside a coin changer providing real-time alarm messages together with digital remote data transmission of vending machine audit data.

reddot design award  
winner 2009

## Profitability:

- Alarm function about service events increases machine uptime
- Cost-effective: No fixed monthly costs, free of charge software
- Integrated design in c<sup>2</sup> coin changer facilitates installation

## Alarm function:

- Alarm via SMS or email to mobile phone(s) and / or to the back-office
- Examples:
  - "door is open" or "cooling unit failed"
  - "certain turnover reached" or "no turnover since x hours"
  - "exact change situation"
  - "no communication with VMC"

## Data collection:

- Cash-flow data from the connected payment systems
- Enhanced vending machine data via DEX, EXE, BDV, the cashless system currenza clip or the universal audit box, currenza audimax
- Machine diagnostics via error report of the coin changer in EVA-DTS format
- „currenza airbox“ module for back-office read-out

## Additional features:

- Additional battery for 'machine power off' detection
- Remote firmware & configuration updates e.g. prices
- Different antenna suitable for particular location requirements

## Software:

- Free of charge back-office software „Audit Manager“
- Provides:
  - Online coin changer alarm configuration
  - Alarm set up and read-out options for text messages / emails
  - Machine turnover evaluation via "Sales Tracker" feature
